HOLISTIC METHOD OF TREATING

INJURED OR PATHOLOGIC TISSUE WITH A LASER

~~PRIOR APPLICATION~~

A 6/23/05

~~This application broadens U. S. Patent 6,302,900 B1 issued October 16, 2001.~~

FIELD OF THE INVENTION

This invention relates to the treatment of injured or pathologic tissue in the body with a laser. More particularly this invention relates to a holistic method of treating the tissue wherein not only the injured or pathologic tissue is stimulated; but additionally, tissues along related body energy paths, as defined and recognized in Eastern medicine, are stimulated with the laser. The laser stimulation normalizes natural body energy flow and facilitates normal cellular activity in pathological areas.

BACKGROUND OF THE INVENTION

The warming and therapeutic effect of laser light on body tissue is known. U.S. Patent No. 5,445,146 issued to G. J. Bellinger in 1995 discloses the use of a laser to reduce pain, to reduce inflammation, and to enhance healing.
